Figure 1: A diagram showing four groups of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.

Figure 2: A diagram showing a sequence of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.

Figure 3: A diagram showing a sequence of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.

Figure 4: A diagram showing a sequence of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.

**Lafmap** is a tool for mapping data from a source to a target. It is designed to be easy to use and to handle a wide range of data types. The tool is built on top of the **Lafmap** library, which provides a set of functions for working with data. The tool is designed to be easy to use and to handle a wide range of data types. The tool is built on top of the **Lafmap** library, which provides a set of functions for working with data.

Figure 5: A diagram showing a sequence of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.

Figure 6: A diagram showing a sequence of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.

Figure 7: A diagram showing a sequence of boxes. The first group has three boxes, the second has four, the third has two, and the fourth has three. Below these, a row of boxes is shown with a comma and a colon. The boxes are arranged in a way that suggests a sequence or a list.
